

The Workers' Compensation Specialists for Manufacturing

Zenith understands the unique challenges of the manufacturing industry.

In 2007, more than 185,000 manufacturing workers sustained workplace injuries, accounting for a staggering 16% of all private sector injuries. The fact that 38% (or 70,210) of those injuries involved an object or equipment, and nearly 21% were due to overstraining means manufacturing workplaces are in need of effective, educational safety programs in order to protect workers from ever-present hazards.¹

Industries as large and dangerous as manufacturing are threatened by unprotected workforces.

Workplace accidents can have a huge impact on your manufacturing business, including:

- Lost work time
- Hiring and training a temporary replacement
- Repairing or replacing damaged equipment
- Reduced employee morale
- Missed revenue opportunities

Zenith's safety & health consultants average more than 15 years of experience in loss control and prevention.

They have the knowledge base needed to analyze issues and provide guidance on risk reduction, and can help you:

- Review your employee management best practices, including: hiring, orientation, training, education and supervisor accountability.
- Develop ideas for transitional return-to-work assignments for injured employees.
- Understand how you might reduce your long-term premium costs by demonstrating how losses can impact your experience modification.
- Recognize hazards and implement corrective actions BEFORE injuries occur. For our manufacturing customers, we focus on key hazards, such as:
 - Burns
 - Cuts and lacerations
 - Electrical hazards
 - Fires and flammable materials
 - Harmful chemical exposures
 - Machinery hazards
 - Musculoskeletal disorders (MSD)
 - Overexertion
 - Repetitive motion
 - Sharp materials
 - Slips, trips and falls
 - Sprains and strains

For more than 50 years, Zenith's focus on service and quality has not wavered.

Zenith provides policyholders with a variety of safety resources at no additional cost.

Safety Program Template: Policyholders can use our online template as a guide to create a written safety and health program.

Online Learning Center: Our learning center includes hundreds of safety courses. Policyholders can track employee progress and evaluate training success rates.

Resource Library: Policyholders can order free safety posters, stuffers and stickers, borrow safety training videos and more!

Zenith University: Our regional seminars help train policyholders to take an active role in controlling workers' compensation costs.

E-Newsletters: Our e-Vitality newsletter promotes the benefits of a healthy lifestyle to encourage employees to stay healthy and safe both in and out of the workplace.

Zenith plays a strategic role throughout the entire claim process.

- Our claims specialists will work closely with the employer, the injured employee and the medical provider to ensure that appropriate medical care and disability benefits are provided per local and national medical guidelines.
- Zenith's certified nurse case managers consult and collaborate with physicians on a regular basis and pay close attention to the injured employees' treatment.
- Our Special Investigation Unit screens all claims involving lost time from work for potential fraud and abuse.
- Our return-to-work staff helps to identify and create opportunities for injured employees to return to work quickly and safely.

Zenith has established this claims management process to help policyholders reduce their insurance costs over time.

Zenith writes many types of manufacturing businesses, including:

- Electronics
- Food products
- Furniture
- Hardware
- Leather goods
- Lenses
- Medical instruments
- Metal goods
- Musical instruments
- Telecommunication equipment
- Tools

Zenith has earned an A.M. Best financial strength rating of A (Excellent).
